Vinduer/døre

Lister til flotte overgange mellem vindues- og dørkarme indvendigt i boligen. Listerne isolerer, gør boligen tættere og er med til at dæmpe støj. Listerne kan bruges til at gøre glas i vinduer og døre fast samt til at lave flotte og harmoniske overgange til ydervægge og sålbænke.

I sortimentet finder du også lister til udvendigt brug.

Gulv

Normalt bruger man fodlister i kombination med en skureliste eller en sandliste, så der ikke bliver luft (synlig afstand) mellem fodlisten og gulvet. Ved dørtrin bruger man fejelister til at lave en flot overgang mellem gulv og dør. Fejelister gør det også lettere at komme over dørtrinnet med f.eks. en støvsuger, og fejelister kan også være med til at mindske træk langs gulvet.

Fokus på klima og miljø

Vi anvender vandbaseret maling i nøjagtigt tilpassede mængder. Altså uden unødvendigt spild. Malingen er fri for syrer og gør ingen skade på naturen, på de mennesker der arbejder med den eller på dig i dit hjem.

Holdbar overflade

Malingen er yderst holdbar og giver listerne en overflade der er nem at rengøre.

Hurtig montering

Hvorfor bruge kræfter på selv at male trælisterne? Spar tiden og skån miljøet ved ikke at have ekstra maling stående ubrugt derhjemme.

Ensartet, høj kvalitet

Vi anvender fingersamlet nordisk fyr, der sikrer, at listerne er fri for knaster. Listerne bliver malet flere gange, så de har en ensartet, jævn overflade. Du får den samme gode kvalitet hver gang.

Kvalitetskontrol

Vores produktionsproces kombinerer avanceret udstyr med håndværk. Produktionen omfatter mange produktionsled og hver enkelt liste gennemgår en nøje vurdering i alle led. Listen bliver desuden finslebet og kontrolleret af vores professionelle medarbejdere.

FSC®-certificeret træ

Vores hvidmalede lister er FSC®-certificeret, fordi det giver os sikkerhed for, at skove drives ansvarligt, og at der ikke fældes mere træ, end skovene kan nå at reproducere. Når du vælger FSC, er du med til at sikre naturen og de sociale forhold i de skove, som træet kommer fra.
